ABOUT

I'm Razvan a mostly self taught ui ux designer driven by curiosity and a love for solving problems. Coming from a creative background i found my path in design because it lets me combine logic with creativity turning complex challenges into clean functional interfaces. im focused on consistency efficiency and constantly learning new tools from Figma to AI Tools and coding as a hobby. Technology evolves fast and im here for it. With patience precision and a problem solver mindset i take on any challenge that comes my way.

EXPERIENCE

HUMAN8   Belgium based company - Remote Working

UI/UX Designer   *09/2022 – Today*

My role is to design projects and collaborate with cross-functional teams to develop user-centered digital products. Create wireframes, prototypes, and high-fidelity UI designs. This role involves ensuring that designs meet user needs and business objectives while maintaining a focus on usability and accessibility.

Responsibilities and Duties

- Develop wireframes, prototypes, and user flows to guide product design and development.
- Design high-fidelity UI elements that follow branding and accessibility standards.
- Work closely with developers and product managers to ensure the successful implementation of designs.
- Facilitate design workshops and ideation sessions to define and refine the user experience.
- Ensure consistency in design by maintaining and updating design systems and guidelines.
- Propose and use plug-ins to automate work and compliance to UI/UX standards (e.g. Quasar, WCAG).
- Decide on solutions to UI/UX challenges that developers, QA ; Product managers face
- Proficient in user-centered design methodologies and tools (Figma, Sketch, Adobe XD).
- Strong knowledge of usability and accessibility standards (e.g., WCAG).

CLEARSKYNETWORK   Israel based company - Remote Working

Web Designer   *08/2021 – 09/2022*

Designed and delivered custom websites for international clients helping businesses build their digital presence. managed projects from concept to launch focusing on clean design and affiliate conversions.

- Created custom website projects for clients across different industries and countries
- Managed full design process including client meetings wireframing prototyping and final delivery in wordpress or coding
- Created responsive mobile first designs optimised for performance and user experience
- improved client engagement and conversion rates through strategic ux improvements

FREELANCE FIVERR   Remote

Web Designer   *01/2019 - 08/2021*

I was creating responsive web design services for projects in WordPress (Elementor Plugin and custom code), Figma and adobe xd.
In general, the projects were e-commerce, landing pages, portfolio websites, business websites, marketing websites and many more.
